

**Physics Lab :**

Engineering Physics laboratory enables the students to realize their theoretical understanding. This laboratory equipped with the concepts of thermal conductivity, properties of matter, semiconductor, lasers and optical fibers. This lab enable the students to apply theoretical concepts while performing the experiments. The students hone their laboratory skills in the due course of Engineering.

**Chemistry Lab :**

In the Engineering Chemistry laboratory, the students can acquire the practical knowledge about the estimation, preparation and instrument techniques.

**Communication Skills lab :**

A well established multimedia language laboratory aims at helping students to overcome their linguistic deficiencies and develop proficiency in English usage. This enables budding professional to enhance their employability and enables into the corporate world.
